Felicita

Size Matters

We took a pragmatic approach to minimizing the work desk and made it extra practical. The result is a stellar compact desk that allows for the same great productivity while taking up significantly less space. The Felicità is the solution to space efficiency that is exceptionally scalable.

Midnight Black

A tone that resembles the darkness of night itself

Porcelain White

Snowy shade that is akin to a luster of creamy ceramic

Practical All Terrain

Flip it, fold it and roll it. These are the fun elements incorporated in our Felicità training/folding table that is suitable for all work or recreational functions whilst also fulfilling your space saving needs.

Agile & Compact

A foldable body allows the Felicità to be easily moved around most environments. Coupled with its light weighted built and lockable caster wheels, the desk can be easily maneuvered and be stored at a safer location after use without the hassle of taking up much needed space be it in the middle of the living room or next to a wall in your bedroom.

Perfect Fit

Be it one, two, or a dozen; the Felicità can be arranged like office stations or a multipurpose desk. The best part is that, it does not need to be permanent. Plus point for those that hates to be in the same spot all the time.

Seamless Folding

Folding a desk has never been easier. The Felicità utilizes a spring action lever mechanism that is robust and easily adjusted. All it takes is a 'pull and clip' action to effortlessly transition the desk by folding it.

Exceptional Quality

Felicità model is made from high quality cold rolled steel, with an easy to use folding mechanism to deliver the extra sturdiness on its lightweight frame

Real World Issues

Space utilization is exceptionally important in many offices and households. The lack of adequate space management may result in extra mess or less than satisfactory furniture arrangements. Therefore, the Felicità is developed to tackle this issue by making space management much easier to be adapted without the need of a large scale planning or more costly solutions.
